

Dear Hiring Manager,

I would like to work at MissionWired as an Associate Data Analyst. I appreciate how MissionWired caters towards non-profits and democrat agencies as an individual who self-identifies as one.

At Hunter Engineering, I used Pandas and SQL to manage automotive data. With data stored in excel spreadsheets, we had to move data to and from our Microsoft SQL server. We used Pandas to handle this transition. On top of using Microsoft SQL, I hosted multiple PostgreSQL servers (on my own personal server) for school projects.

I am a rock climber and I free solo outdoor climbing routes. In stressful situations, I can perform. I remain calm while precisely and quickly planning my next move when comfortable with the terrain. I code and rock climb the same way. I explore the terrain, failing many times, sometimes repeatedly attempting the same failing action. I learn and eventually master.

I do not have Tableau experience but would be willing to learn it.

If you are interested in speaking further, I would greatly appreciate an email.

Thank you,
Rowan Torbitzky-Lane
